Strabag Highlight Business Towers

Strabag is the fourth largest construction firm in Germany and the largest in Austria

They are the lead contractor on the €100m construction of 'Highlight Business Towers' in Munich designed by the internationally renowned architects Murphy/Jahn. The international project team has identified numerous benefits from adopting Sword CTSpace's on-demand collaboration.

The contemporary office design includes 28 and 33 storey connected towers with a seven storey hotel complex attached.

During the planning phase, the project team were not using Sword CTSpace's solution for their collaboration requirements, however, when Strabag was appointed main contractor Sword CTSpace's collaboration software was named as a requirement for the project. Furthermore, it was also made a requirement that all project information would migrate to the Sword CTSpace system.

In order to get the project up and running as quickly, and seamlessly, as possible, Sword CTSpace dedicated a technical team to the project to oversee the transfer of around 2,000 drawings and documents. Another team was responsible for ensuring all members of the project team were trained either in a face-to-face classroom session or through innovative Internet based conferencing software.

Before the migration of the data could take place, Sword CTSpace's development team were required, by the project team, to release new functionality in a very short time period. The architects worked with Xref drawings, where CAD drawings are linked to one another, and it was vital that these Xref links were not lost when the migration to the On Demand solution took place. Sword CTSpace's new functionality identifies, during upload, whether a document has Xref links and retains them when documents are uploaded to the collaboration solution.

Project Details

- €100m Highlight Business Towers project in Munich
- Internationally renowned architects, Murphy/Jahn
- 28 and 33 storey connecting towers
- 7 storey hotel complex attached

Benefits

All members of the project team, including the subcontractors, have instant access to the most recent project information.

A central location for all documentation and communications has resulted in a reduction in international courier and telephone costs.

The integrated reprographics module ensures that all requests can be ordered and delivered, quickly and efficiently.

The "Process Manager" allows the team to track all communications and RFIs relating to the project.

The high level of transparency allows the project team, including the client, to track project status.

"We were impressed at how quickly Sword CTSpace met our requirements for this project. Functionality that was vital to the project team was developed within a very short time period."

Hans-Joachim Mießeler, Head of Project Management, Strabag AB
